Our Premium Product: Full Time Schedule Train between China and Europe in less than 12 days*

^{*} Average duration of transport with DBCE Speed Trains

Southeastern Europe becomes the new location for the Eurasian corridor – Welcome to Budapest

Providing superior cost/time efficiency with rail cargo

- √ 75% of costs saving in comparison with Air Freight
- ✓ Two times faster than Sea Freight
 - Total ø 17–20 days
 - o Full Time Schedule Train: ø12 days
- Climate friendly
 - 95% less CO2 than Air Freight
 - 80% less CO2 than Road Freight
 - o 13 times less nitrogen oxides than Sea Freight
- √ 0% damages
 - o To DB Cargo Eurasia broad-gauge trains
- ✓ 24/7 monitoring

Customers who have included Eurasian Rail Corridor to their supply chains:

The Eurasian Rail Corridor is an attractive solution to industries with high added values and require shorter lead time than ocean freight

Electronic devices e.g. HP Laptops

Finished vehicles e.g. Volvo cars

Automotive components e.g. BMW

Cosmetics e.g. L'Oréal Paris

Operations on the Eurasian Corridor are stable and safe

- ✓ Trains are **guarded** by a local security service on the entire transit route during short operational stops
- ✓ Track & Trace
- ✓ Trains cover around 800km/day in both Westbound and Eastbound traffic.
- Transit is **not affected** by the current sanction regime
- ✓ Safe door/door loading method of containers on broad gauge

We trace your containers in real time and offer easy online booking

- ✓ Track and Trace of freight in real time
- Easily accessible booking platform (in development)
- ✓ Free online tools:
 - searching for the right <u>NHM Codes</u>
 - looking at DB Cargo's international <u>Network</u>
 - searching for the freight railway stations with <u>DIUM</u>
 - choosing modes of transport from an ecological perspective with <u>ECO</u> TransIT World

Rail offers the most climate-friendly solution between Europe and Asia
